

## CIPSA/PI Indirect Category Indexes and Benchmarking Reports

### Capacity utilisation of MFDs

- Maintaining a fleet of multi-function devices (MFDs) and photocopiers can be a complex and time consuming job.
- PI has benchmarked market data and found average cost models in a variety of environments. Cost and utilisation variations demonstrate to clients which groups of machines to reassess.
- Understanding the performance of your current fleet of MFDs can reveal and quantify saving opportunities to informed procurement professionals.

#### Cost factors compared to total annual copies
