

CIPSA/PI Indirect Category Indexes and Benchmarking Reports

Industrial Consumables

- Industrial consumables are a complex category to manage. Finding savings opportunities within thousands of line items can be next to impossible without the right analysis.
- PI has benchmarked real market data and found variations at item level and aggregate level for thousands of industrial consumables items.
- These variations between the lowest, average and highest costs are significant and represent saving opportunities for informed procurement professionals.

Price benchmarking for two industrial consumable items against lowest and average price
